EDUCATION

Vellore Institute of Technology

November 2022 - May 2026

Bachelor in Technology in Computer Science

CGPA - 8.23

Shevgaon English Medium Jr. College

July 2022

12th - MAHA HSC Board

Nirmal Bright Future School

July 2020

10th - CBSE Board

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, HTML5, CSS3.

Frameworks/Tools: React.js, Node.js, Flask, Aws, Postman.

Databases: MongoDB, PostgreSQL, MySQL.

Concepts: OOPs, Full-stack Development.

PROJECTS

Git Docs | [GITHUB](#) | [DEMO](#) | *Python, Flask, Html, CSS, Next.js.*

January 2026

- Built GitDocs, an AI-powered documentation generator that converts GitHub repositories into structured technical docs or blogs, reducing documentation time by up to 85% for developers.
- Designed a responsive frontend in Next.js and a backend with python, achieving 500+ concurrent users.
- Engineered a smart parsing engine using NLP and AST (Abstract Syntax Tree) analysis to extract key insights from over 1,000+ code files across multiple languages with 95%+ accuracy.

Tomato- A food delivering website | [GITHUB](#) | [DEMO](#) | *JavaScript, CSS, MongoDB, React.js, Node.js.* **May 2025**

- Implemented asynchronous Stripe payment integration with webhook handling and secure tokenization, reducing checkout completion time by 35% and improving user satisfaction scores by 28% across 1,000+ beta users.
- Built robust RESTful API architecture with JWT authentication and rate limiting, featuring 15+ endpoints for CRUD operations that achieved zero failed transactions and 99.9% uptime during 3-month beta testing with 500+ daily active users.
- Optimized MongoDB database schema with proper indexing and aggregation pipelines, increasing query performance by 15% and reducing data inconsistencies by 22% while enabling real-time order tracking.

Hospital Management System | [GITHUB](#) | *Java, JavaScript, React.js, MySQL, REST APIs.*

November 2024

- Developed a full-stack Hospital Management System using Java, Spring MVC, React.js, Spring Security, MySQL, and REST APIs, implementing core hospital management workflows.
- Implemented role-based authentication and authorization with Spring Security for patients, doctors, receptionists, administrators, and hospital staff, ensuring secure access to application features and data.
- Built patient, doctor, appointment, prescription, and employee management modules with CRUD operations, integrating React.js with Spring MVC REST APIs and MySQL for centralized data management.

WORK EXPERIENCE AND ADDITIONAL INFORMATION

Vyraine | Web Developer

[March 2026] – [May 2026]

- Developed and deployed Vyraine's responsive website using React.js, JavaScript, HTML5, and CSS3, implementing reusable UI components, responsive layouts, and optimized frontend functionality to deliver a seamless user experience across devices.
- Integrated responsive frontend components and interactive website features using React.js, JavaScript, HTML5, and CSS3, focusing on reusable components, cross-device compatibility, and improved user experience.

Volunteering:

- Led regional clubs and contributed to open-source projects enhancing web accessibility and performance, while actively participating in a farmer awareness campaign on organic farming and vermicompost preparation across five villages in Jalna district (Dec 1–7, 2025), organized by the Foundation for Rural and Agriculture Development.

CERTIFICATIONS

- IBM Gen-Ai certificate:** Earned IBM Gen AI certificate, developing new skills in AI. [Link](#)
- Full stack Development with MongoDB:** Certified in Full-Stack Development, mastering the MERN stack. [LINK](#)
- SQL (Basic) – Hacker Rank:** Earned Hacker Rank SQL certification. [LINK](#)
- Infosys Springboard React:** Earned Infosys React certification, validating skills in building user interfaces. [LINK](#)
